COMSWITCH[®] 3.0

Shown with included wall or under-shelf mounting bracket

1. SWITCHES

automatically to your phone, fax or answering machine!

2. ZAPS

to keep many telemarketers out!

3. ALERTS

you to incoming calls or faxes while online!

The ComSwitch 3.0 provides the three most useful features you'll ever add to your telephone line, all in one simple device.

Your incoming calls will automatically be **SWITCHED** to your fax or answering machine. Many telemarketing computer dialers will be **ZAPPED** with special tones that tell them your phone number has been disconnected, removing your number from their call list. Plus, when you're online with your computer, the ComSwitch 3.0 will **ALERT** you to incoming calls, allowing you to briefly[†] take the call without losing your online connection.

Save money every month by eliminating your fax/modem line.

- Switches faxes to your fax machine, **EVEN WHEN YOU'RE ONLINE** or not at home
- Unanswered calls are switched to your answering machine
- Works with Voice Mail *(Requires Distinctive Ring service from your phone company)*
- The TeleZapper[®] feature helps reduce computer-dialed telemarketing calls
- Works with Caller ID and Call Waiting Caller ID so you can see who is calling while you're online without answering the phone *(Requires Call Waiting ID device and Call Waiting ID service from your phone company)*
- Works with computer dial-up modems
- **38 USER-PROGRAMMABLE FEATURE SETTINGS**

[†] Approximately 5-15 seconds.
Actual dual connection time depends on a variety of factors, including your Internet Service Provider.

* Requires Call Waiting from your phone company.

TeleZapper is a registered trademark of Royal Appliance Mfg. Co.
